New President: the return of an icon.

Designed for those who always look to the future without ever renouncing tradition, Faema's new machine, President, revisits the iconic models of the '60s offering cutting-edge technology.

It is a machine in which the past and future coexist. The result is a sophisticated product that is not only capable of elevating the space thanks to its restyling, but also distinguishes itself in terms of quality and innovative features.

Adjustable thermal system.

The new thermosiphonic President guarantees the thermal regulation of each individual group thanks to the Thermo-balance system, to meet the needs of the most demanding coffee professionals.

The external regulation of the group temperature provides the perfect setting for dispensing a single coffee and to offer a wide menu, in case several coffee blends are used.

A design with a timeless style.

Faema President stands out for its minimal and essential shapes and an industrial and elegant style.

Vintage and modern style continue to coexist in the thermosiphonic President, in which steel dominates in the high structure and black matt in the base, in addition to the details of the steam levers and handles of the filter holders.

One machine, infinite personalities.

Design and style make the new President a truly unique machine. However, it is made even more exclusive by the endless customization options. Thanks to the easy-to-remove system, it is possible to customize the base and the entire body of the machine.

Because ergonomics is performance.

Care and passion for details. The new Faema President embodies this approach, which is not only designed to fit the style of every bar, but to meet the needs of every barista.

INNOVATIONS

Faema President Termosiphonic presents important innovations, designed specifically to simplify the workflow of the coffee specialist and improve their performance.

- **Service management** and **programming** take place directly through the coffee group, and no longer through the display.
- **Coffee groups** have been centered to improve ergonomics and optimize the barista workflow.
- **Adjustable-height basin.**
- **New autosteam**, with tilting and adjustable wand.

To complete the features available to the barista:

- Ergonomic filter holders.
- Customizable setting by group touch screen or three/five buttons.
